## Labor Attacks On Bedeaux Are Cause of Change

Her Grace Deeply Disappointed at Not Seeing Native Land — British Press Applauds Act.

WASHINGTON, Nov. 6.—William Green, president of the American Federation of Labor, said he did not believe it was advisable for him to comment on the visit of the Duke and Duchess of Windsor. Green previously had said he concurred in a statement by the Canadian miners criticizing the Duke's choice of Charles Bedeau, efficiency engineer, as his guide for the American tour.

PARIS, Nov. 6.—A tour of the United States may be made early in 1938 if not disclosed today by a member of the Duke of Windsor's suite.

PARIS, Nov. 6.—The Duke of Windsor last night postponed his trip to the United States for the study of housing and industrial conditions because of "grave misapprehensions" over his motives. Announcement of the postponement came less than 15 hours before the Duke and Duchess, who travel in seven, were to start for a 37-day tour of America.

It was issued through Percy Philip, president of the Anglo-American Oil Co., a subsidiary. Neither the Duke nor any member of his party was present.

## Postpone Their Trip To Future

## Cheap Money Rules Biggest Municipal Canada Bond Issue

Refinancing Plan Has Reached Final Stage With Rates Reduced One-Half On \$34,630,527.19 Debentures

By Canadian Press

WINDSOR, Ont. Nov. 6.—Completion of the city of Windsor's refinancing by the largest municipal bond issue in the history of Canada was officially announced here last night by Mayor E. S. Wigle.

The refinancing scheme does not affect the principal value of the debentures, but the interest rates have been slashed approximately in half by order of the Ontario Municipal board.

### New Debentures Run Into \$34,630,527.19

The scheme was launched several months ago when the Ontario Municipal board sanctioned the issue of \$34,630,527.19 worth of new debentures to be exchanged for the old bonds of the four former municipalities of East Windsor, Walkerville, Windsor and Sandwich, which now form the amalgamated city.

### Bonds Ready To Be Exchanged

"I have received official information from the city's fiscal agent, C. W. McDermid, that the printing and validation of all bonds has been completed and that they have been handed over to the Guaranty Trust Company, who are acting as transfer agents," Mayor Wigle said.

"These bonds are now ready to be exchanged for all the bonds of the various municipalities now comprising the city of Windsor."

### Refinancing Scheme In Final Stage

"The refinancing plan which has been under way for so many months has now reached its final stage and all that remains is for the bondholders to get their new bonds, clip the coupons and collect their interest."

The Windsor city debt settlement was effected by July 25, Fortin's Bond Dealers' Association under pressure of Premier Hepburn who refused to permit payment of average interest in excess of 3 per cent. Interest payments were deposited "in trust" and held for final settlement with the result \$3,000,000 of a total of \$6,000,000 in accumulated high interest was not paid to the bondholders but was returned to the Windsor city treasurer.

The total bonded debt of \$34,630,527.19 was extended over a period of thirty years at interest rates of 1½ to 4 per cent—one-half the total amount of average interest previously paid.

The settlement effected provided for a 40-mill tax rate as being the most that could be safely levied without confiscation of the homes and property of Windsor citizens.

### No Relief For Edmonton

Jules E. Fortin's plan for Edmonton on behalf of the Bond Dealers' Association provided for the debt to be spread over thirty years without any reduction in interest rates. All present bond issues until maturity carry the high and unreasonable interest rates of 4½, 5, 6 and 7 per cent.

Do Edmonton taxpayers want the Fortin plan revised before it is too late?

### Mrs. Hahn Found Guilty Of Murder

CINCINNATI, Nov. 6.—Mrs. Anna Marie Hahn, 31-year-old mother, of a small town, was found guilty of killing her two sons and her husband, making the death penalty mandatory.

Anthony H. Hlynka, referring to Mr. Gray's speech at Montreal, in which he called for reduction of interest, lowering of individual farm products and the like, said the Alberta government had worked for the same thing.

Other speakers were S. Calvert, M.L.A. for Victoria; Joseph Wolanczyk, M.L.A. for Vancouver; J. G. Ross, M.L.A. for Kings Park, and W. D. Duran of Edmonton.

### Government Remains Silently, But Papers Carry Editorials

LONDON, Nov. 6.—Decision of the Duke and Duchess of Windsor to postpone their trip to the United States was applauded in British newspapers today. Most prominent papers played the story under big headlines and some had editorials.

The government, which maintained the Duke's behavior was welcome, had welcomed the decision since it was understood to mean that the trip could not go on as good as the position the Canadian labor had taken.

Editorial comments included the London News Chronicle (Liberal) which said:

# Bedeaux Attack Cancels Duke's Trip

## DECISION MADE WITH GREAT RELUCTANCE

Duchess Is Particularly Grieved At Change In Tour Plan

Continued from Page One great reluctance because of "grave misgivings" which were "grave and misleading which have appeared" about the motives and conduct of the trip.

No date was set for the journey was set and there was no indication what the Duke intended to do next.

Detained in Canada for the present came after a three hour conference among the Duke, his Canadian agent, Lord D'Asprey, and others.

The statement said the Duke emphatically repeats that there is no shadow of justification for any suggestion he is allied with any industrial organization, either for or against any particular political party.

"The Balance Federation of Labor last Wednesday "warned" organized labor not to be involved with him in his tour to America and to study labor." It called Charles E. Bedaux, who had been arranging the Duke's tour, an "archenemy of labor."

**DEADUX CABLES**

The Duke, a few hours before the Paris trip was to begin, called the Duke from New York and told him all details of his tour in connection with the tour "because of mistakes attacks upon me here."

Even close associates of the Duke were surprised by the final decision until the last minute.

Earlier, a day of conjecture as to the Duke's reaction to the action of the Baltimore Federation of Labor, which had been made by a terse command issued by Lord Fawcett, Foreword stating, "There is absolutely no change in our plan."

British sources said the decision was based upon two factors:

1.—The Duke desired not to call attention to himself in America.

2.—The Duke considered it in view of the resolution of the Baltimore Federation of Labor the time was not ripe for visit.

**TEXT OF STATEMENT**

The text of the statement follows: "The Duke has decided that half of the Duke of Windsor that he has decided to postpone his visit to America."

"His Royal Highness arrived at this decision with much reluctance and with many misgivings. His feelings that owing to grave misconceptions which have arisen and exist concerning the Duke regarding the motives and purpose of his industrial tour there was no doubt but to defer it to the present."

"The Duke emphatically rejects any suggestion that he is allied with any industrial organization for or against any particular political or racial doctrine, and he expresses the earnest hope that the former government's real and sincere motive for the proposed visit is America will be fully understood."

"His Royal Highness will personally extend his thanks to all industrial companies who so generously extended invitations to him and who assisted in the arrangements."

The French press published the Baltimore resolution under screaming

The Duke's friend, Bedaux, at whose private chateau the Duke and Duchess stayed, 2 miles from Paris, was "attacked" by American labor organization for proposing the Duke to visit during which the Duke was to make many American industrial plants.

Bedaux has been criticized in some labor circles for his organization of what they term an industrial "stretch-out" or speed up system.

The Duke and Duchess were to

be staying in America to study labor. It called Charles E. Bedaux, who had been arranging the Duke's tour, an "archenemy of labor."

**HOTEL DIGEST**

The North Whig, in Belfast:

"In deciding not to go to America the Duke of Windsor has acted with dignity and wisdom. In an atmosphere of tension, even of hostility, to be received with a great deal of enthusiasm, would have been frustrating and would instead of doing good might have made things worse."

The Birmingham Gazette:

"The Duke is a stubborn man and may not rest content under this re-buff."

**Don't Want To Injure Relations**

PARIS, Nov. 6.—The Duke of Windsor, who wants to not damage cordial Anglo-American relations caused him today to defer his planned trip to the United States, a member of the Duke's immediate family said.

While the Duke's plans were to have been Labor criticism, the request came in connection with the tour was seen as the final factor.

It was learned that the Duke, in London, rather than the United States before reaching his 11th hour decision.

**VISIT LATER**

The Duke and Duchess hope to come to the United States when circumstances cause it. In view of Germany and France, their visit to Germany and Canada, the Duchess has died down. This was informed.

It was established that Charles Bedaux, the system of industrial production was to be replaced as soon as possible by the Duke's tour.

"I would like to him to come here and get a look at this Bedaux system," he said.

## STUDY OF NUDE CO-ED PHOTOS HEADACHE JOB

Head of Wayne University Health Service Tells of Procedure

**DETROIT**: Nov. 6.—Looking at photographs of hundreds of nude Wayne university co-eds is a headache job, according to Dr. W. Sander, chief of the school's health service.

This was his observation after a minor furor arose when two parents objected to the taking of nude pictures by the health service.

Dr. Sander vigorously defended the system and pointed out that it is a valuable educational tool for the schools including Stanford and the University of Iowa and Michigan.

**PHOTOGRAPH GUARDED**

Mrs. Rea Peterson, a registered nurse and one of the co-eds who over saw the procedure, Dr. Sander explained.

"We took about 900 last Sunday evening and we worked all day Sunday developing and printing and we aren't half done. It's a heavy load."

Girls to be photographed are taken on at a time into a room where a screen and a special clinic building. Dr. Sander said a registered nurse instructs the girls and she is handed a hospital nightgown.

"Then," Dr. Sander explained,

"we take the picture and the girls stand off to the side and in front of the floor. The girl, wearing a nightgown, stands on a stool and the photographer sees the student only through the lens."

**PHOTOGRAPH WEARS MASK**

"Then," Dr. Sander said, "we turn the room down a curtained aisle at the end of which is met by another registered nurse who takes the mask off and stands on a stool a few inches from the floor. The girl, wearing a nightgown, stands on a stool and the photographer sees the student only through the lens."

The parents and girls who object to their names were not divulged.

Some names were not divulged

—were curious about who took the pictures.

Dr. Sander reassured them.

**NURSE OPERATES CAMERA**

"During the picture-taking, he said, "we on the floor stand on the stool except registered nurses, myself and the student. Mrs. Peterson takes the pictures in the excess of 900 every day."

**Mystery Shrouds Fate Of 80,000 Chinese Soldiers**

NANKING, Nov. 6.—The last mystery concerning the fate of 80,000 Chinese soldiers who have been missing since the fall of Nanking last October is still shrouded in mystery.

After the Japanese capital was captured by the Nationalists, the Chinese army was disbanded.

Now, the Japanese are

still searching for the missing men.

They are convinced," said Alex Ross, executive secretary, "there were 80,000 Chinese soldiers fighting for the Chinese Republic in the United States by 1940. We are

concerned about the balance of power nationally as it does today in New York."

At the moment, the new film organized what they called the "Liberty League."

### THREE OTHER ITEMS

When they go to the polls Saturday, Edmonton citizens will have some other matters to attend to besides electing a mayor and finding vacancies on the aldermenic and public school boards.

They will be asked to say by plebiscite whether in future years the mayor of the city shall be elected by popular vote, as at present, or whether he shall be chosen by the members of their own ranks.

Those of the electors who are burgesses will also be asked to ratify two new by-laws. One of those would provide \$50,000 in bonds for the building of a new hangar at the air port. The other would authorize council to borrow and spend up to \$100,000 in public funds.

There are three other important questions more important than the amounts involved in the money by-laws would indicate. It is to be hoped that the battles royal between candidates for the various offices will be conducted in a spirit of good will thought will be given in these matters. They deserve something more than off-hand expressions of indifferent opinion.

### BETTER KEEP CONTROL

To abolish elections for the mayoralty in Edmonton, and to give the aldermen a longer year selector a major departure from the procedure followed in this and nearby, if not all, other Canadian cities. And it would alter in no small respect the administration set up established when the city charter was being framed.

To do away with the annual contest for the mayoralty is a radical measure from the public mind. In most cases, however, better to go to the polls, and to inform themselves before-hand on the civic masters in preparation for so doing. It is usual in a recall election to do nothing with the voters' mandate.

say all running expenses and interest charge, and take care of the capital instalments as well. The burgesses would be very ill-advised to not vote strong approval of the small sum required to build the new "garage."

### POLICE PROTECTION

The burgesses will also be asked to approve the spending of \$25,000 on a new police signalling system. The situation simply is that the present apparatus is a wreck, if not a relic. It is both a waste of time and of condition that repair can not be made to the system. The long term expense it is cheaper to install now and thoroughly modern equipment.

And in this matter the cost is the least important consideration. The Chinese has adopted a curious name of doing so. Can we Japanese war lords really do such that their actions in bombing cities to pieces, slaughtering non-combatants and overrunning large areas of the country will fill the Chinese with an eager spirit of co-operation? A Chinese aside on the Chinese side of the border has been approached. Despite all the cruelties and inhumanities being suffered at Japanese hands, the Chinese government is continuing payment of its debt to Tokyo, for redemption of loans and Boxer indemnity. The Chinese have been patient and scrupulous a people has at last been roused to fierce resistance show how enormous and unbearable the invader's aggression has become.

### TWO NATIONS

Japan, says its spokesman, wants to re-establish friendly relations with China. This has caused a curious name of doing so. Can we Japanese war lords really do such that their actions in bombing cities to pieces, slaughtering non-combatants and overrunning large areas of the country will fill the Chinese with an eager spirit of co-operation? ### CROP RESTRICTION

When any nation embarks on a programme of curtailment of crops, hazards little appreciated at the outset begin to trouble them. The United States has made attempts to restrict cotton production by various means. One result of the programme is the increase in cotton prices. The stimulus to the cotton market makes it necessary for a large number of cotton farmers to be forced to sell their crop at a loss.

Other factors of production have been affected, too, and the shrinkage in trade for the southern cotton growers remains a fact that cannot be avoided.

The logical end of the road is a production of cotton in the United States.

It is to be hoped that the cotton growers will discover that, for the sake of a temporary advantage, for the sake of a little extra money for a few years, they have reduced their standard of living and the standard of living of others.

This is the case with the cotton growers.

# Real Progress Made At Old Age Pension Conference

**RESIDENCE  
CLAUSE MAY  
BE DROPPED**

**Finance Minister Pleased  
At Manner In Which  
Task Attacked**

Ottawa, Nov. 6.—New regulations and amendments to those now in force were unanimously adopted by the Dominion Provincial Conference of old age pensions here last night. The changes, which were made public until they had been approved by the Dominion and Provincial governments.

Finance Minister Dunning, who attended and presided over the conference, expressed his satisfaction at the "co-operation and constructive attitude" that marked the deliberations.

Changes proposed in administration, the minister said, were designed to meet the constructive objectives of the conference. These objectives were to assure that no person, just because he is old, would be denied the right to receive a pension.

The Dominion and Provincial legislation should be deprived, that right, of any element of unfairness and inefficiency in administration and to prevent abuse and unjustified costs.

At least two representatives attended from every province to a total of 250 delegates, including officials of the finance department and some legal advisers.

The changes, based on old age pensions provided for in the act but which has not met for some years, will be submitted to the order of the government-in-council, with two members from each province, the minister added.

He said: "The Dominion government—Finance Minister and Deputy Minister W. C. Clark."

"I have been attending Dominion-provincial conferences over the last few years and have never seen one that have been held in that manner. I can say, however, that my experience has never been better. I am present at a conference which appears to be a real meeting of minds, with deliberations with such a spirit of co-operation and such a constructive attitude."

"It is a great thing for Canada that a conference of this sort represents the co-operation of governments and the Dominion government, has been able to reach a unanimous decision on all the problems placed before it."

It was understood one regulation will require that old age pension must have five years' residence in the province to which he applies. This is to prevent old people from moving to another province to collect pension; Rev. Mr. Joseph Smigelski, of horse; Rev. Mr. Tommie MacIntosh, of Alberta; Rev. Mr. Mike Cymbaluk, theft; Rev. Mr. Edward Albert and William Alberta, theft; Rev. Mr. John Bailey, theft; Rev. Mr. Thomas Clayton, retaining stolen property; Rev. Mr. Peter Felcewych, retaining stolen property.

The fact that the population of the country has been decreasing during the next year or two, if it has not begun already, means that more people are leaving the country, the workers who would emigrate to other social bodies, to the cost of which the provinces will be put in part, are provided by the state. Finally, he cannot be deported if he is a Canadian citizen.

Other changes will concern residents in Canada, naturalization methods of assessing income, calculations of age, and dealing with pension changes. Pending of properties and responsibility of children, the support of their parents were also among the questions studied.

During this period, in spite of the decline of man-hours, the rate of physical expansion was such that the birth-rate of new jobs exceeded the rate of physical expansion. The interest rate was maintained and our business was good.

The second epoch, as compared with the first, is an epoch of negatives. During this period physical expansion has been appearing zero. The death-rate of old jobs has exceeded the birth-rate of new population growth and appears zero, and due to the decline of the rate of physical expansion, the interest rate has continued to decline.

Purchasing power of small incomes (those below \$750 a month) has been declining.

Further, the composition of events comprising these two epochs seems to indicate a definite phenomenon. Consequently we can only go forward from here; regardless of what may be held in store, the composition of events of the first epoch will never be repeated.

The rule of the Price System, while the need of the primitive agricultural society, which were invented, were found to work sufficiently well during the first epoch, does not seem to do so in the second epoch.

Nothing much has been said about it but that is already on the horizon. The Canadian dollar, \$1.00, will exceed 40,000 tons and is, in fact, the largest ship ever built in Canada, and will have the decks two-screw turbine steamer with an average speed of 22 knots.

Nothing much has been said about it but that is already on the horizon. The Canadian dollar, \$1.00, will leave this country for the Dominion annually, as was the case in the first epoch.

Now that the old Waterloo Bridge has been demolished and the new bridge will begin within the next few weeks.

Nothing much has been said about it but that is already on the horizon. The bridge is resting on wooden which were found to be in excellent condition after 120 years.

Nothing much has been said about it but that is already on the horizon. The contractors hope to drive at least 100 piles a week.

## G. F. POWELL, UNWIN CASE HEADS LIST

### 15 Criminal Cases Set For Hearing in Court Next Week

Heading a list of 15 criminal cases set for hearing in the Supreme Court next week are the defense and prosecution in a case against George F. Powell, Social Credit technical advisor to the provincial government, and J. H. Chisholm, former MLA.

It is expected their trial will open on Tuesday morning next. In addition to the libel charges they will face charges of "commencing murder."

Retrial of Mrs. Helen Labine, St. Paul, accused of shooting a shot gun at a typewriter, totally unsuccessful over the weekend, is also a matter of interest.

**1938 CHEVROLET  
STYLES COME IN  
TRIO OF SERIES**

**Interest in New Cars Con-  
tinues in Mechanical Im-  
provements**

The new Chevrolets for 1938 are announced today in three series—the Master, the DeLuxe, and the positive Master DeLuxe, with many pleasing changes in appearance and performance. The mechanical improvements, said to be more numerous than 290 than in any year before.

Chief of these is the new "Modern Mode Styling" which departing from previous years, will mean safer and more comfortable driving. Second in importance is the change in the new after-steering mechanism, embodying new ease and certainty of steering. The Master and Master DeLuxe Models.

The Fisher No-Draft ventilation system is now well under way at General Motors factories in Oshawa and Regina, and the first cars are due in dealers' showrooms across Canada.

**AT PREVIEW**

At a preview of the 1938 Chevrolets in the Oshawa factory there was unanimous agreement among automotive writers and engineers that the new styling and mechanical improvements will be considered a major contribution to the year's new development. The Fisher No-Draft ventilation system, the new clutch and lighter pedal pressure, which decreases during the stroke, the new engine, and the smooth operation of the car, is far more simple in construction, weighs less, is more durable and never fails to be interested.

Bodies, both sedan and expressiveness, have been revised with distinctive refinements of features which already have been proved by Chevrolet. The body is more easily familiar with the 45-horsepower high-compression, valve-in-head, overhead camshaft engine, which is acclaimed for its power, smoothness, economy and freedom from service trouble. The Fisher plant is to be found in both series.

Again offered on all the new models is the Fisher No-Draft ventilation system contributed to Chevrolet's sales leadership in the low-pricing field and a definite advantage in both silent all-steel turret top bodies by Fisher and the trouble-free hydro-mechanical clutch.

In the case of the engine advances are principally in the nature of refinement and improvement. There is, however, that a new and lighter fly-wheel in conjunction with the overhead camshaft engine, gives greater quietness and quicker response to the controls, and valve-operated valves and certain parts of the engine of the 1938 item have been redesigned rather than simply replaced. There is a fast-free trip of heat from the combustion chambers, especially in the vicinity of the exhaust.

**RELATED TO UNITS**

The electrical system includes the new starting mechanism similar to that used on the Fisher No-Draft ventilation cars. It has an over-running clutch and automatic thrash advance, automatically setting the engine to a fast a new weather-light, and accessible battery mounting.

The Fisher plant will note with interest the convenience and utility of the trunk models, providing ample room for luggage and gear.

The woman driver in particular will be interested in the more attractive interior, which is more spacious and also easier to read.

Upholstery and trim are of finest materials and craftsmanship. Grey moquette velvet is used in the Master series, with grey cloth or blue-grey moquette velvet in the Fisher Special series. Tupe cloth upholstery is supplied in the Master DeLuxe body, interior, with tupe plush available as an option.

Imperial Airways Gets Its  
Mandate To Circle  
Globe

SOURCE: Press  
LONDON, Nov. 6.—With a mandate from the British government to complete the chain of Empire air routes around the globe as fast as possible, Imperial Airways are now working at top speed with important new ventures.

The pioneering of the Atlantic route in conjunction with Pan-American Airways has been followed by a step in an ambitious plan to run an air line "over the top of the world" from London to Australia via the way of Alaska and on to a junction with the England-Australian service at Singapore.

This Australia and New Zealand will get their Canadian mail direct from Britain.

**CONTROLS BASES**

While Great Britain controls the air bases for the Atlantic service, with the exception of Alaska, Canada and Australia-Bermuda being a key point even in the southern route—the Americans have control of the Pacific bases, particularly Hawaii. Although they have a wide network of air routes with Pan-American Airways, the British will avoid Honolulu on the return trip, so that the Americans now planning to route a route by way of Alaska and the Aleutian Islands will be able to cover the top of the world from the American towns of Asia.

It has been discovered that there is a warm current something like the Gulf Stream which flows across the Atlantic, running along the Aleutian Islands which makes the establishment of an air base there practicable.

**IR SHORE CUT**

The establishment of this "Ir" of the world will be the beginning of the future of the earth, is a "short cut" across the Pacific is at present, however, only a matter of time.

The immediate objective is the establishment of a trans-Pacific air route across the North Atlantic and continued on across the Canadian routes.

A high-speed air service over 2,000 miles from Croydon to Vancouver may be in operation by the end of the year. "Top of the World" service will be within sight.

By the trans-Canada service Montreal will be brought within two hours of Vancouver by a daily service. The first flight will be on the Atlantic service. The Atlantic service, however, will be still more remarkable.

**Rally Treaties**

LONDON, Nov. 5.—Great Britain, Canada and Soviet Russia today signed a series of mutual agreements to Anglo-Soviet and Anglo-German naval treaties.

**ABOUT 1,000  
CANADIANS IN  
SPANISH WAR**

Convinced They Are War-  
ing Upon Fascism Vis-  
itor Declares

Canadians fighting for the legal government of Spain are convinced that they are waging war against fascism. Harold Smith, national secretary of the Canadian Labor Defence League, said Friday as he reached the city on a lecture tour.

With Mr. Smith, a former member of the Manitoba provincial legislature and former clergymen, was Walter Dent, 20-year-old Toronto youth, who serves as a sergeant in the Canadian Labour Defense side of the Spanish struggle and fighting for it for seven months.

Mr. Smith said that Canadians fight in their fortitude and clear in their understanding as to the meaning of war in Spain. Mr. Smith said.

**OFFERING LIVES  
FOR DEMOCRACY**

"They valued," he continued, "that they were fighting Fascism and offering their lives in defense of democracy."

As Prudent Adam said last July, "These men are here solely because of their love of democracy."

There are about 1,000 Canadians now fighting on behalf of the Spanish government, Mr. Smith declared.

Mr. Smith said he was recently sent as a "good-will overseer" of a group of Canadian volunteers from citizens of Canada and the United States.

He said he made the categorical statement that all that money reached the people it was sent for.

**CHRISTIAN PRESENT**

At present, he continued, an attempt is under way to send \$3,000 to the Spanish government in Spain as a "sort of Christmas present" to buy clothing and other necessities for the soldiers and citizen-soldiers waging during the raw Spanish winter.

The main purpose of campaign being waged by General Franco, Dent argued, was to terrorize the people of Spain by bombing the fences houses and unfertilized fields.

But the morale of the whole government army, and the countryside, he continued, was so high that the impact of the assault, he concluded,

Surpassing the real army were troops from Italy and Germany, he said.

He said the Spanish government was backed by the resources of a war machine second to none in the world.

In his speech, he said, Dent charged.

**NEW CONCEPTION**

He said the "new ground" and new foreign planes had come over the battlefield, unleashing bombs that hit home.

One gained a new conception of "the mockery" of the non-inter-

vention past, the youthful volunteers.

The present struggle in Spain was not a civil war, but a direct intervention of the fascists of Spain and Germany, eager to convert the nation into a war base for the expansion of Fascism over all Europe.

Dent reasoned.

Canadian volunteers breed the spirit of class struggle. Canadians in Spain, building libraries, playing music, making speeches by means of radio bulletins the country over, and continuing their education during the frenzied strife.

But their urgent need is to develop their baptism of fire.

**BATTALION STAFF MEDAL**

For the volunteer troops from Canada and the United States, the Mackenzie-Papineau and Lincoln battalions, have been the spearhead in the fight.

Mr. Smith said that the men of the Government army, he continued, are deemed the shock-troops of General Franco, he said, do not preclude resistance as of royalist, resistance to Fascism as of royalist, resistance to the government army felt that the chief subjugated by Franco and his supporters.

Mr. Dent will speak at the Rialto Hotel, 10 a.m., Saturday, Dec. 4, in commemoration of the twentieth anniversary of the birth of the Soviet Republic.

NEW OFFICERS  
AT WETASKIWIN**

WETASKIWIN, Nov. 8.—On one

of the most public school buildings in Wetaskiwin in a two-day session with Harry Irving, president of the Canadian Teachers' Federation, the new officers were elected.

Mr. Irving said that the election was held to give the members of the teachers' association a chance to elect their own officers.

## Looking Them Over

Change Scenes

Wenstob Away

Sauerkraut Pep

This weekend sees the Edmonton sport calendar revised for the start of the football season. This year the curtain will be rung down on the football campaign in State parks and the University of Alberta Golden Bears are at the Varsity grid for the city championship. The time of the game is 3:30 p.m. On the strength of the showing they made against the Huskies of the University of Saskatchewan at Saskatoon last Saturday, the E.A.C. should take the bears.

Then tonight the curtain will go up on the hockey season in Edmonton when the Calgary Rangers play the Dominions in an exhibition game at the Arena. It will get underway at 8:30 p.m. This will be the first chance Edmonton fans have had of getting a line on how the new men may fare in the way of defense from the Big Six League. Both clubs will use their regular lineups.

Sunday afternoon with no big gold paws of the stage for another season when the decisive match for possession of the T. Eaton Company's challenge trophy is fought at the Country Club. Jim Mountfield and Doug Kilburn will be defending against the challenge of Henry and Bert Martell. The Martells defended this bowl 11 times this season and then possession of it to Mountfield and Kilburn. This pair then became the consecutive defenders. The rules of the trophy are that the names of the pair defending it most number of times each season are engraved on it.

If the weather is decent this match should end the Edmonton golf season in a blaze of glory.

## Wenstob On Way To England

**EDDIE WENSTOB**, western Canada's light heavyweight champion and claimant to the Canadian title, is now en route to England for a second crack at the old money ring. Along with his business manager, Ken McDonald, Eddie is leaving on Friday. They will arrive in New York on Wednesday on the Normandie. Eddie's first fight overseas will be under the promotion of Sid Hills in the Empress Stadium, London, on Nov. 24, against Liebrandt of Germany.

Best wishes of thousands of fight fans in this section go with Eddie and Ken. Wenstob has had a harder battle with adverse circumstances than so far he has had in the ring. With the support of his manager, Bob Penman, Eddie appears to be rid of those drawbacks and set to go places in the fight world.

Ken McDonald, well-known Edmonton sport writer, has been given a big help by the Victoria Flash. Ken believes in getting the best available when he goes after something, so he plans to get Ted Brodribb, former manager and trainer of Tommy Farr, when Wenstob over and work on his weaknesses.

Somewhere or other, Eddie is losing the kayak shape that his punches and kicks are right. He is determined to get back into shape before his boxing is said, his physical condition excellent and no one yet suggested that he didn't have plenty of courage and stamina. This inability to put an opponent out will probably be found in the way he tends to "lay" on his punches as he starts them and the fact that his body does not go forward with the blow but falls off slightly to one side.

## U.S. Coaches Pep Power Plays With Calories

**WHEN** American college football fans watch a 225-pound tackle slay three or four opponents down in the mud with one fell swoop and a splash this season, they can take it that the said tackle is filled with either sauerkraut juice or deroxane tablets instead of the variety spirit which used to animate him.

It appears that the coaches have become ultra-scientific lately.

They have discovered this college spirit and found nothing reliable in it. There isn't a calorie to be found even in Navy's stirring battle cry.

But the coaches have been so interested in the calorie count that they issued solemn assurances to the grid masters that calories are the source of touchdowns—so the coaches are now busy devoting dozens of methods of packing big reserves of calories into their gridiron.

Ralph Sauer of Mississippi State leads all coaches in the number of experiments he has carried out. Already he has fed his team rock candy, juice, orange juice, tomato juice, sauerkraut juice and even glue when they come into the dressing room between halves. Sub Allison feeds his California Bears a glass of water with three lumps of rock candy in it. Another coach maintains a glass of orange juice with a deroxane tablet dissolved in it. The tablet contains as many calories as a two-meal steak and they can be absorbed into the system in 30 seconds.

Buck Shaw of mighty little Santa Clara, however, has no use for such scientific capers.

"No pleasure for our guys," rumbles Buck. "All I feed 'em between halves is a lot of oil. They thrive on it."

All Ritine of Regina will agree that Buck has something there.

## Chess

The great fight for the chess championship of the world is now in Holland. Dr. Max Euwe, the chess master, and the challenger, are the participants. Interest in this match is intense, particularly in Europe.

In the appended game, Black continues his brilliant assault when he makes his eighth move. Played in Vienna in 1910:

# Clarke Warmly Denies His Health Is Unfavorable

## Can Still Battle, He Asserts: Cowper Tells Housing Plan

**Mayor Clarke's "Edmonton First" Program For Civic Progress Meets With Approval at All Meetings**

Hurting a drift would be difficult, who, in charge had resorted to a "whispering campaign" to sway his health and emphatically declaring that "I am still able to live my weight in wild-cats." Mayor J. A. Clarke, in a speech delivered at municipal election campaign meeting, last night, in the whole-hearted favor of restoring earlier wage scales to the 1936 level, established after a 40-hour five-day week; immediate development of the Edmonton Airport and immediate reconsideration of the Fortin plan.

"Mayor Clarke was awaiting the results of the election at Alberta Avenue Community Hall, where the largest congregation of the current municipal campaign was held.

In addition to Alberta Avenue meetings, there were in Victoria Park and Riverdale schools.

### LITTLE HECKLING

More than 150 attended the meeting at Alberta Avenue, while about 100 were present at the other meetings.

The little heckling took place, although it was high voltage. Mayor Clarke crossed swords with Daniel K. Knott, former mayor and now one of his opponents who attacked the scenes of a vigorous meeting.

Alberta Avenue, undaunted by the scenes of a vigorous meeting, was unshaken in its support of practically all the other meetings.

Alberta Avenue responded rapidly and warmly to Mayor Clarke's call for a vigorous campaign against the housing rapids one after another.

Mayor Clarke spoke at all three meetings. Advertising the four major principles of his platform, he called for the adoption of a comprehensive program of support of each.

All the cities in Alberta to prepare the brief on behalf of Calgary, Lethbridge, Red Deer, Medicine Hat, and Grande Prairie, said Alderman Fry. Mr. Patterson said, in urging that this choice offered proof of the fact that he was not a member of council.

"As you well know, Alderman Fry has served here for five years and has been a faithful servant to the citizens of Edmonton," he added. "The choice of Alderman Fry for this last seat has embarked on a moderate low cost campaign. It is the intent of the houses built under this scheme is ready to suffice, if this is not already done, Mr. Patterson submitted.

### VARY KNOWLEDGE

"It is recognized that Alderman Fry is a man of varied and wide fund of knowledge of municipal affairs," he continued, as he urged others to support Mr. Fry's candidate.

"There is no question that you vote for Mr. Fry," he said.

Referring to moves now in the Stinking Fund, he said the fund was sinking fast and would soon be bankrupt. At the last report, the total amount of the millions of dollars of bonds in the city, he said, was \$1,000,000.

He was very anxious to see that money be made available to be made available from the Stinking Fund, by virtue of the Fortin plan, he said.

### NEED BUILDING

Gus Patterson, mayoral candidate, declared that "I believe that we have a large number of people who are anxious to see that the city is built up again."

He asked that they make sure that many that difficulties will be confronted in attempting to work for greater good of the city.

"I do not think these difficulties are insurmountable and I am sure that the city will be in a position of coming year will appreciate any assistance from any source whatever," he said.

"There is no doubt, but when the time comes, that the city will be in a definite way. The practice of the idea will be considerably different from what it is now," he said.

He said that the city is in a very bad shape, though at the same time he said he did not think it was.

Charles William Westley Lee, aldermanic candidate, urged that the budget be balanced, so that the city can find money to carry out its responsibilities.

Thomas Housey, public school board candidate, said he did not need to stand idly by while the city was in a bind.

He said that the city would oppose the Fortin plan, he said.

TWEEDSMUIR'S  
NAVAL AIDE ON  
JOURNEY HOME

OTTAWA, Nov. 6.—Lieutenant S. G. Tweedsmuir, naval aide to the Canadian post as aide-de-camp to the governor-general, has left for England to take his leave before which he left for service with Lord Tweedsmuir.

He will chose to leave his post here one year before his term expired, feeling he would lose contact with the navy if he remained longer.

Last summer, Rivers, a companion of the governor-general, completed a complete itinerary of his tour through the northwest and British Columbia, accompanied by a member of Lord Tweedsmuir's staff who covered the whole journey of more than 10,000 miles.

His successor is Lieut. Scott, also of the Royal Navy.

Five weeks ago he left in the ship he had been assigned to, the Canadian naval supply ship, the "Vimy," bound for Europe. He has been assigned to the "Vimy" since he was promoted to the rank of captain.

## THIS CURIOUS WORLD

by  
William Kerasco

### JUPITER

IS THE GIANT PLANET OF THE SUN'S FAMILY / IT IS MORE THAN THREE TIMES AS LARGE AND ABOUT THREE TIMES AS MASSIVE AS ALL THE OTHER PLANETS, INCLUDING OUR EARTH, PUT TOGETHER.

HOWEVER, NO LIFE IS KNOWN TO EXIST THERE.

THERE ARE NINE MOONS, FOUR OF WHICH ARE LARGE ENOUGH TO BE SEEN CLEARLY, EVEN THROUGH FIELD GLASSES / THEY WERE DISCOVERED BY GALILEO, IN 1610, WHEN HE FIRST VIEWED THE PLANET THROUGH HIS NEWLY INVENTED TELESCOPE.

THE HUGE PLANET FORMS A BEAUTIFUL TELESCOPIC OBJECT / IT IS FLATTENED AT THE POLES, AND THE SURFACE IS CROSSED BY DARK BELTS RUNNING PARALLEL TO ITS EQUATOR.

AT ONE TIME, ASTRONOMERS BELIEVED JUPITER TO BE A VERY HOT WORLD, SINCE THEY KNEW IT WAS NOT A SOLID BODY / HOWEVER, RECENT MEASUREMENTS INDICATE A SURFACE TEMPERATURE OF ABOUT 400 DEGREES BELOW ZERO.
